Киев, Киев, Украина

Общие сведения

Info for recruiters:

I may not respond to your message, cause it takes some time to process them all. But thanks for sending it! You may keep sending current offers, I'll check them out when I'll look for new opportunities.

Info about me:

Ever since I was a little kid, my dream was to become a developer, and I'm proud and happy that one of my dreams come true :) Programming is not only my work, but it is also on the list of my hobbies, so I'm very lucky that have found something that I really like and enjoy from the first try.

The main goals of work are active endless growth (that's one of the reasons why I choose JavaScript), learning new technologies and approaches, staying up-to-date with front-end ecosystem, and applying best practices to produce high-quality products. I have been working with the following domains: ERP, VR, Fintech, HR, Automotive. Also, I enjoy growing comprehensively.
